

General Online E-learning Course Information

“Quality” Body of Knowledge:

The “Quality” Body of Knowledge, overall, consists of Best Business Practices, Scientific Tools and Quality/Risk Management Methodologies used to maximize organizational effectiveness and efficiency to enable the production of world-class quality products and services. Please view a specific course Table of Contents (TOC) for more details.

Training Goals:

These Online E-learning Courses are designed to teach Technical Professionals a targeted “Quality” Body of Knowledge and to prepare them to take the appropriate ASQ Certification Exam. ARE, LLC does issue a “Course Completion Certificate” with the appropriate number of CEUs, upon course completion.

If you plan to obtain a **highly recognized and respected ASQ Certification** in a particular “Quality” Body of Knowledge, then please deal directly with ASQ regarding the Certification Exam. For ASQ Exam testing locations, dates, and pricing please click on the following link: <https://asq.org/cert>

Note:

- All courses are very high quality and comprehensive, created by very experienced SME experts
- The training materials used in the course video training sessions are downloadable as PDF files

Instructors:

All instructors have taught the “Quality” Body of Knowledge to 100’s of Technical Professionals just like you and most instructors have taught at the College level. All instructors will respond quickly to all course inquiries via email, etc. Additionally 1 - 2 Webinar Study Group Sessions are held monthly, attendance is optional, to address any questions the students have regarding their training material.

All of our instructors have a teacher’s heart and want to build a lasting relationship with any student who reaches out with questions pertaining to their training and career...think of your instructor(s) as a Mentor.
